Digital Efficiency and Workflow with Dr. Langan and Nobel Biocare

Dr. Adam Langan graduated from the University of Nebraska-Lincoln with a bachelor of science degree in biology and a minor in biochemistry. He went on to earn his DDS, with distinction, from the University of Nebraska Medical Center College of Dentistry in 2009. Dr. Langan does all of his own digital workflow processes (planning, guides, placement, post placement restorative, etc) and can speak to the digital environment needed in today's dental workspace to improve efficiencies and create a better overall experience for a patient needing quicker, more accurate, and sometimes... more creative support. Through the use of his digital tools, his office has become incredibly beneficial to his patients as not only a dental expert, but one who can deliver complex procedural processes in a timely and cost efficient manner for the patient.

Please RSVP by Friday, October 9th, 2026
